## Parts services

Initially to support our own repair and maintenance requirements but then extended to supply to third party maintainers and end-users, pks services are one of the largest parts supply organisations in the uk. Our considerable experience in the multi vendor industry coupled with our comprehensive parts inventory and warehousing facility means pks stock all of the commonly used parts and components required to maintain a full range of leading manufacturers products.

pks services stock the following:

Maintenance Kits	Fusers
Fuser Films	Feed Roller Kits
Pick Up Rollers	Pressure Rollers
Separation Pads	Transfer Rollers
Transfer Kits	PCB' s
Print Heads	Motors & Fans
Consumables	PSU's
Paper Trays	Covers

Stock items are available for delivery the next working day. Purchase online by credit/debit card, pro forma invoice or via pre-established credit account facilities.

## Brokerage service

Our service offerings are extended by our brokerage division, experienced and competent in sourcing large quantities of products for contracts or even just one of those no longer manufactured products, from the second user market place. Furthermore, through our extensive contacts with manufacturers and component specialists both in the UK and internationally, we are also able to source those discontinued and difficult to find parts in order to extend a products life cycle. pks services source these units, parts and components allowing our customers to save both time and money in carrying out this function themselves.
